Summary

I build products, not just pages. I care about clean architecture, speed and user experience, and I like to see a problem through to a real, shipped version.

Skills

Backend & architecture: PHP, Laravel, REST

Frontend & UX: JavaScript, jQuery, Vue.js, Inertia, Bootstrap CSS, Tailwind CSS

Databases & performance: SQLite, MySQL, SQL Server, PostgreSQL, Redis

DevOps & deployment: Linux, nginx, Apache, Speedlight, Git, Supervisor

Experience

Senior Full-Stack Developer — Sample Company One

Mar 2022 – Present

Designed the architecture and built the core product with Laravel and Vue; cut response times on busy pages.

Laravel · Vue · MySQL

Backend Developer — Sample Company Two

Jun 2019 – Feb 2022

Built APIs and internal systems with automated tests and continuous deployment.

PHP · Laravel · Redis

Selected projects

Darman (1379)

Receptioning, Scheduling and Accounting system

Dos · Foxpro

Education

B.Sc. Computer Engineering — Sample University

Sep 2014 – Jul 2018
